DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 37-40, drawn to a method of manufacturing capacitors, classified in class 29, subclass 25.42.
 - II. Claims 41-46, drawn to a method of manufacturing laminated capacitors, classified in class 29, subclass 830.

2. The inventions are distinct, each from the other because of the following reason:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I does not require the particular of either a laminated capacitor or laminating a plurality of capacitor elements, as required by Group II. The subcombination of Group II has separate utility in forming laminate capacitors.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
